

BYU MUSEUM OF ART

# OPEN STUDIO: MOTHER'S DAY

Hello! Welcome to Open Studio!

Today, we will be creating art to honor of the women in our lives, inspired by the women artists featured in our exhibit:

## **A STUDIO OF HER OWN: WOMEN ARTISTS IN THE COLLECTION**

This exhibit features 60 different female artists and 112 works in a variety of media, including painting, textiles, prints, photographs, and digital. These women and their artwork have inspired, influenced, and paved the way for the next generation of artists.

Please take a moment to walk around the gallery.  
(You can find this exhibit on the museum's main level)

As you explore the gallery, ponder how each of these different styles of art represent women or something traditionally associated with women.

**Jann Haworth**  
**French Charm Bracelet**  
**Mixed Fabric, 2007**

A pioneer of soft sculpture, this work showcases Haworth's ability to manipulating fabric and her skills as a seamstress. Charm bracelets memorialize specific moments of time. Haworth developed a love for France and French culture through her travels with her mother.

***What is a memory you have with your mother that you would add to your own charm bracelet?***

**Jeanne Leighton-Lundberg Clarke**  
**Harmony in Blue**  
**Oil on canvas, 1990**

For Clarke, the trend of minimalism was unable to capture the cluttered, and often busy, experience of being a woman. The abundance of fruits and flowers serves as a reminder of the plenitude of good things that surround us

***In this painting, a family is gathered around the table to partake in the abundance together. Where does your family gather?***

***How does this remind you of your own home?***

# CELLA LILIES

## SUPPLIES:

18 Gauge Floral Wire (9"-10" lengths)

White Felt Sheet

Green Felt Sheet

Wilton Flower Stamens

Hot Glue Gun

## STEPS:

- a. Twist the stamen tops slightly so that they clump together
- b. Wrap the ends of the stamen's around the stems
- c. Add a dab of hot glue to the stamens and wrap them around the wire
- d. Add a dab of hot glue to the bottom of the petal piece and press wire into the glue just below the stamens
- e. Apply hot glue along right bottom edge of the petal
- f. Lightly wrap the right side of the petal around the stamens
- g. Apply hot glue along left bottom edge of petal
- h. Gently wrap the left side of the petal around to the back of the flower, Hold in place until glue dries
- i. Add a line of glue down the center of the base leaf
- j. secure the base to the front of the flower, covering the very bottom of the petal
- k. Wrap and glue the base around the petal and the wire
- l. Add a dab of glue to the bottom center of the leaf and attach it at the bottom base piece. Wrap the leaf around and glue the sides together.
- m. REPEAT!

**\*If you do not have these supplies at home or available to you, you might consider using construction or tissue paper, pipe cleaners, and Elmer's glue.**
