

# CREATE YOUR OWN STEAM ENGINE!

## Supplies:

- 2 sheets of cardstock
- Popsicle sticks
- Toilet paper roll
- One section of an egg carton
- Paint
- Glue (hot glue recommended)

## STEP 1

Cut a sheet of card stock in half and use popsicle sticks to create a train track that covers about  $3/4$  of the page.

## STEP 2

Use paint to decorate your toilet paper roll and egg carton.

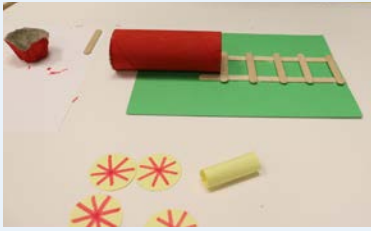

## STEP 3

With your second piece of card stock, cut out a 2x1 inch rectangle. Roll the rectangle into cylinder and secure with tape to create a chimney.

## STEP 4

With the remaining card stock, trace and cut out four circles. Use markers to decorate them as your wheels.

### STEP 5

Once your toilet paper roll has dried, glue it onto the card stock at the end of the tracks.

### STEP 6

Glue the section of egg carton, chimney, and four wheels onto your train.

### STEP 7

Once your train is dry, glue a cotton ball to the top of your chimney, then add two or three more to create smoke.

### STEP 8

Finally, decorate your landscape, use markers to add flowers and plants!
